

AI & VISUALIZATION NOTICE

Last updated: 18.05.2026

AI-Assisted Visualizations

3DIMS may use AI-assisted technologies to generate or enhance:

- photorealistic renders,
- design previews,
- visualization concepts,
- lighting simulations,
- and presentation images.

These visualizations are intended for:

- concept presentation,
- inspiration,
- and communication purposes.

Rendered images may differ from final real-world results due to:

- material variations,
- lighting conditions,
- construction tolerances,
- manufacturing limitations,
- or regional product availability.

AI-generated visuals do not replace:

- engineering verification,
- construction supervision,
- or local technical compliance.

Users remain responsible for verifying final construction solutions with qualified professionals.
